The User Experience / Visual Designer will work with the Creative Director to create successful design pieces.

You're the right person for this position if:

- You are a strategic, analytical designer, comfortable creating work flow diagrams, Information architecture diagrams, and wireframes
- You have strong aesthetic skills with mastery of layout, color, and visual systems
- You are an experienced motion designer with the ability to create basic to intermediate flash animations and prototypes.

### **REQUIRED SKILLS / EXPERIENCE:**

- Ability to conceptualize and articulate design solutions, as well as ability to work with established design concepts and approaches
- Experience with the interactive design process - brainstorming, concepting, architecting, development and deployment
- An understanding of the fundamentals of developing a functional user-interface
- Solid understanding of benefits and limitations of current technologies (HTML5, AJAX, Javascript, etc.)
- Knowledge of and experience working with Flash (Basic Action Scripting)
- Strong Photoshop and Illustrator skills
- Must be a team player who is willing to accept full range of responsibilities and roles
- Must exhibit fastidious and efficient production and optimization habits
- Ability to work alone and be self-motivated and willingness to take direction
- Experience working with clients to achieve desired goals and objectives
- Ability to work under tight deadlines

### **PREFERRED SKILLS / EXPERIENCE:**

- Previous design studio or agency experience
- Bachelors Degree in Graphic Design, Art or other related field
- Experience in the high tech and/or financial industries
